1 ISOLATIONS AND PREPARATIONS

Exercise No. 1	Fractionation of Serum Proteins by Ammonium Sulfate	1
Exercise No. 2	Isolation of Immunoglobulins by Gel Filtration on Sephadex G 200 Column	3
Exercise No. 3	Isolation of IgG by DEAE Cellulose	8
	Part A Column Chromatography	9
	Part B Batch-Type Operation	11
Exercise No. 4	Dissociation of Macroglobulins With 2-Mercaptoethanol	12
	Part A	13
	Part B	13
Exercise No. 5	Enzymatic Cleavage of IgG	14
Exercise No. 6	Chromatographic Separation of the IgG Fragments	16
Exercise No. 7	Separation and Isolation of H and L Chains of IgG	17
Exercise No. 8	Affinity Chromatography and Its Application to Antibody Isolation	19
Exercise No. 9	Cellulose Acetate Paper Electrophoresis of Human Serum	23
Exercise No. 10	Disc Electrophoresis in Polyacrylamide Gel Part A Separation of Serum Proteins	26
	Part B SDS Gel Electrophoresis of Erythrocyte Membrane Proteins	27
	Part C Molecular Weight Determination by SDS Gel Electrophoresis	31
Exercise No. 11	Separation of Human Hemoglobins by Electrofocusing	32
Exercise No. 12	Conjugation of Antibodies With Fluorescein and Rhodamine	35
	Part A Fluorescein	41
	Part B Rhodamine	42
Exercise No. 13	Enzymatic Labeling of Proteins With ^{125}I	44
	Part A	44
	Part B	46
Exercise No. 14	Preparation of Peroxidase-Labeled Antibody	48
Exercise No. 15	Preparation of Soluble Dinitrophenyl Proteins	51
Exercise No. 16	Preparation of Dinitrophenyl- and Trinitrophenyl-Labeled Erythrocytes	54
	Part A	54
	Part B	56
Exercise No. 17	Isolation of Cell Membranes From Ascites Tumors	57

<i>Exercise No. 18</i>	Preparation and Use of Synthetic Liposomes	61
<i>Exercise No. 19</i>	Isolation of Murine Transplantation Antigen Preparation	63
<i>Exercise No. 20</i>	Isolation of Bacterial H-Antigens	66
<i>Exercise No. 21</i>	Extraction of Bacterial O Antigens (Endotoxins or Lipopolysaccharides)	69
	<i>Part A</i> Trichloroacetic Acid Method	69
	<i>Part B</i> Phenol-Water Procedure	71
	<i>Part C</i> Chloroform-Methanol Extraction of Endotoxic Glycolipid (EGL) From Rough Mutants	72
<i>Exercise No. 22</i>	Preparation of ^{14}C -Labeled Endotoxin and Endotoxic Glycolipid (EGL)	73
<i>Exercise No. 23</i>	Isolation of Bacterial Capsular Polysaccharides, K Antigens	76
<i>Exercise No. 24</i>	Extraction of Teichoic Acid	78
<i>Exercise No. 25</i>	Extraction of <i>Pneumococcus</i> Type XIV Polysaccharide	80
<i>Exercise No. 26</i>	Isolation of Phytohemagglutinin	82
<i>Exercise No. 27</i>	A and B Blood Group Antigen Preparations From Erythrocytes	84
	<i>Part A</i> Solubilization With Dilute NaOH	84
	<i>Part B</i> The Use of Detergent	85
<i>Exercise No. 28</i>	Isolation of NN Blood Group Antigen From Human Erythrocytes	86
<i>Exercise No. 29</i>	Isolation of Forssman Haptens From Erythrocytes	88
<i>Exercise No. 30</i>	Isolation of Ragweed Pollen Allergens	90
<i>Exercise No. 31</i>	Ultrasonic Disruption of Bacteria and Density-Gradient Centrifugation of the Products	93
<i>Exercise No. 32</i>	Vacuum Distillation and Freeze Drying	96

2 STRUCTURAL STUDIES

<u>2.1 QUALITATIVE METHODS</u>	99
<u>2.1.1 Hydrolytic Procedures</u>	99
<i>Exercise No. 33</i> Determination of Optimal Hydrolytic Conditions	99
<i>Part A</i> Carbohydrate Liberation	100
<i>Part B</i> Liberation of Amino Acids and Amino Sugars	101
<i>Exercise No. 34</i> Hydrolysis of Lipopolysaccharide With Acid	102
<i>Exercise No. 35</i> Partial Hydrolysis of Lipopolysaccharide With Ion Exchanger	104
<i>Part A</i> Discontinuous Method	105
<i>Part B</i> Continuous System	107
<u>2.1.2 Separation and Isolation of the Split Products</u>	110
<i>Exercise No. 36</i> The Methods of Analytic and Preparative Paper Chromatography	110
<i>Part A</i> Preliminary Runs	111
<i>Part B</i> Preparative Procedure	113

Exercise No. 37	Separation and Isolation of Peptides or Oligosaccharides by High-Voltage Paper Electrophoresis	117
Exercise No. 38	Demonstration of Ion Exchange Column Chromatography of Amino Acids	120
Exercise No. 39	Gas-Liquid Chromatography for Fatty Acid Separation	124
Exercise No. 40	Carbohydrate Analysis by Gas-Liquid Chromatography	127
Exercise No. 41	Gas-Liquid Chromatographic Analysis of Amino Acids	131
Exercise No. 42	Demonstration of Thin-Layer Chromatography	135
<u>2.1.3 Some Other Qualitative Methods for Structural Studies</u>		140
Exercise No. 43	Qualitative Analyses of the Constituents of an Unknown Natural Product	140
Exercise No. 44	Identification of N-Terminal and C-Terminal Amino Acids	147
	Part A N-Terminus	149
	Part B C-Terminus	150
	Part C Paper Chromatography of the Amino Acids and Their Derivatives	151
Exercise No. 45	Staining of Gels for Carbohydrates	153
Exercise No. 46	Methylation of Carbohydrates	156
<u>2.2 QUANTITATIVE ANALYTICAL DETERMINATIONS</u>		159
Exercise No. 47	Dry Weight and Inorganic Ash Determinations	159
	Part A Total Dry Weight	159
	Part B Inorganic Ash	160
Exercise No. 48	Microdetermination of Nitrogen	162
Exercise No. 49	Microdetermination of Phosphorus	166
Exercise No. 50	Protein Determination by the Biuret Method	168
Exercise No. 51	Determination of Primary Amino Compounds With Ninhydrin	169
Exercise No. 52	Carbohydrate Determination by Phenol-Sulfuric Acid	171
Exercise No. 53	Ultramicrodetermination of Reducing Carbohydrates	173
Exercise No. 54	Enzymatic Determination of Carbohydrates ..	175
	Part A Glucose	176
	Part B Galactose	177
Exercise No. 55	Determination of Amino Sugars	178
Exercise No. 56	Determination of Heptoses and Pentoses ..	180
	Part A Heptose	180
	Part B Pentose	181
Exercise No. 57	Determination of Sialic Acid and 2-Keto-3-Deoxyoctonic Acid Derivatives	182
	Part A Sialic Acid	183
	Part B 2-Keto-3-Deoxyoctonic Acid	184
Exercise No. 58	Chemical and Biologic Analysis of Compounds Separated by Preparative Thin-Layer Chromatography	185
	Part A Chemical Analyses	186
	Part B Measurements of Biologic Activities ..	189

Exercise No. 59	Oxydation of Carbohydrates With Periodate. Quantitative Spectrophotometric Determina- tion	191
Exercise No. 60	Measurements of the Products of Periodate Oxydation	194
	Part A Formaldehyde Determination	194
	Part B Formic Acid Determination	195
Exercise No. 61	Reduction of Carbohydrates With NaBH ₄	196
	Part A Determination of the Degree of Poly- merization	197
	Part B Identification of the Reducing Termi- nal Carbohydrate	198
	Part C Investigation of the Glycosidic Link- ages by Periodate and Borohydride Treatment (Smith Degradation)	200
Exercise No. 62	Quantitative Determination of Free Hydroxyl Groups	203
Exercise No. 63	Lipid Determination With the Hydroxylamine Method	205
Exercise No. 64	Qualitative and Quantitative Analysis of Carboxylic Acids	207

3 IMMUNOLOGIC AND OTHER BIOLOGIC ASSAYS

3.1 ANTIBODY PRODUCTION	211	
Exercise No. 65	Immunization and Adjuvant Effect	211
	Part A Soluble Immunogen	212
	Part B Particulate Immunogen	213
Exercise No. 66	Demonstration of Antibody Production at Cellular Level (Immunoplaque Method)	215
3.2 ANTIGEN-ANTIBODY INTERACTIONS	217	
3.2.1 Methods of Agglutination	217	
Exercise No. 67	Bacterial Agglutination	217
Exercise No. 68	Hemagglutination and Its Inhibition	219
Exercise No. 69	Passive Hemagglutination and Its Inhibition Part A Neter's Method	224
	Part B Boyden's Procedure	226
	Part C Carbodiimide Coupling Method	226
	Part D Inhibition of Passive Hemagglutination	227
Exercise No. 70	Charcoal Agglutination	230
3.2.2 Precipitation Methods	232	
Exercise No. 71	Double Gel Diffusion/Ouchterlony Method ...	232
Exercise No. 72	Immunoelectrophoresis	235
Exercise No. 73	Quantitative Immunoelectrophoresis/Rocket Method	237
Exercise No. 74	Crossed Immunoelectrophoresis	240
Exercise No. 75	Counter Immunoelectrophoresis	243
Exercise No. 76	Semiquantitative Micro-Precipitin Assays ..	245
	Part A Microtitration in Gel	245

	<i>Part B</i> Determination of Optimal Antigen/ Antibody Ratio by Gel Diffusion	248
Exercise No. 77	Quantitative Precipitation	249
Exercise No. 78	Quantitative Radial Immunodiffusion	251
Exercise No. 79	Radioimmunoassays for Cyclic AMP and Cyclic GMP Determinations	254
	<i>Part A</i> Cyclic AMP	255
	<i>Part B</i> Cyclic GMP	258
Exercise No. 80	Solid-Phase Radioimmunoassay	261
	3.2.3 Other Reactions of Antibodies and Immunocytes	263
Exercise No. 81	Complement Fixation	263
	<i>Part A</i> Preparation of Reagents	265
	<i>Part B</i> Hemolysin Titration	266
	<i>Part C</i> Titration of the Complement	266
	<i>Part D</i> Qualitative Complement Fixation (Determination of the Proper Antigen Dose for Quantitative Complement Fixa- tion Test)	268
	<i>Part E</i> Anticomplementary Controls	269
	<i>Part F</i> Quantitative Complement Fixation	269
Exercise No. 82	Total and Viable Cell Counts	272
Exercise No. 83	Direct and Indirect Staining of Bacteria With Fluorescein-Labeled Antibodies	275
Exercise No. 84	Unlabeled Antibody-Enzyme Method to Localize Antigens	277
Exercise No. 85	Isolation of Human Lymphocytes by Sedimenta- tion	280
Exercise No. 86	Isolation of Adhering Leukocytes	282
	<i>Part A</i>	283
	<i>Part B</i>	284
Exercise No. 87	Rosette-Forming Cell Assay	285
Exercise No. 88	Passive Cutaneous Anaphylaxis	288
Exercise No. 89	Lymphoblast Assay	290
Exercise No. 90	T Cell-Mediated Cytotoxicity of Influenza Virus-Infected Cells	293
	3.2.4 Miscellaneous Biologic Reactions	297
Exercise No. 91	The Local Shwartzman Phenomenon	297
Exercise No. 92	Measurement of the Activity of the Reti- culoendothelial System	299
Exercise No. 93	Enhancement of Nonspecific Resistance to Infection	301
Exercise No. 94	Determination of Toxicity	303
Exercise No. 95	Measurement of Pyrogenicity	305
	SUBJECT INDEX	309
