SUMMARY OF CONTENTS

	Preface	xix
	Preface to the First Edition	xxi
	Before You Begin	xxiii
PART I	**THE BASICS**	
Chapter 1	Working with Excel	3
Chapter 2	Creating Charts: An Introduction	47
PART II	**ADVANCED SPREADSHEET TOPICS**	
Chapter 3	Creating Advanced Worksheet Formulas	59
Chapter 4	Creating Array Formulas	91
Chapter 5	Advanced Charting Techniques	109
Chapter 6	Using Excel's Database Features	133
Chapter 7	Importing Data into Excel	147
Chapter 8	Adding Controls to a Spreadsheet	159
PART III	**SPREADSHEET MATHEMATICS**	
Chapter 9	Some Mathematical Tools For Spreadsheet Calculations	169
Chapter 10	Graphical and Numerical Methods of Analysis	193
Chapter 11	Linear Regression	207
Chapter 12	Non-Linear Regression Using the Solver	223
PART IV	**EXCEL VISUAL BASIC MACROS**	
Chapter 13	Visual Basic for Applications: An Introduction	241
Chapter 14	Programming with VBA	251
Chapter 15	Working with Arrays in VBA	279
Chapter 16	Creating Command Macros	291
Chapter 17	Creating Custom Functions	299
Chapter 18	Creating Custom Menus and Menu Bars	309
Chapter 19	Creating Custom Toolbuttons and Toolbars	317
PART V	**SOME APPLICATIONS**	
Chapter 20	Analysis of Solution Equilibria	329
Chapter 21	Analysis of Spectrophotometric Data	339
Chapter 22	Calculation of Binding Constants	349
Chapter 23	Analysis of Kinetics Data	373
PART VI	**APPENDICES**	
Appendix A	Selected Worksheet Functions by Category	391
Appendix B	Alphabetical List of Selected Worksheet Functions	397
Appendix C	Selected Visual Basic Keywords by Category	417
Appendix D	Alphabetical List of Selected Visual Basic Keywords	421
Appendix E	Shortcut Keys for PC and Macintosh	441
Appendix F	Selected Shortcut Keys by Category	457
Appendix G	About the CD-ROM That Accompanies This Book	463
	INDEX	469

Excel® for Chemists: A Comprehensive Guide. E. Joseph Billo

ISBNs: 0-471-39462-9 (Paperback); 0-471-22058-2 (Electronic)

CONTENTS

Preface xix
Preface to the First Edition xxi
Before You Begin xxiii

PART I: THE BASICS 1

Chapter 1 Working with Excel 3
The Excel Document Window 3
Changing What Excel Displays 4
Moving or Re-Sizing Documents (Windows) 5
Moving or Re-Sizing Documents (Macintosh) 5
Navigating Around the Workbook 5
Selecting Multiple Worksheets 6
Changing Worksheet Names 6
Rearranging the Order of Sheets in a Workbook 6
Navigating Around the Worksheet 7
Selecting a Range of Cells on the Worksheet 7
Selecting Non-Adjacent Ranges 8
Selecting a Block of Cells 8
Entering Data in a Worksheet 9
Entering Numbers 10
How Excel Stores and Displays Numbers 10
Entering Text 11
Entering Formulas 11
Adding a Text Box 12
Entering a Cell Comment 12
Editing Cell Entries 13
Excel's Menus: An Overview 13
Shortcut Menus 15
Menu Commands or Toolbuttons? 15
Opening, Closing and Saving Documents 15
Opening or Creating Workbooks 15
Using **Move, Copy** or **Delete** Sheet 16
Using **Close** or **Exit/Quit** 16
Using **Save** or **Save As...** 16
The Types of Excel Document 17
Using Save Workspace... 17
Printing Documents 18

Using **Page Setup...** 18
Using **Print Preview** 19
Using **Print...** 19
Printing a Selected Range of Cells in a Worksheet 20
Printing Row or Column Headings for a Multi-Page Worksheet 21
Editing a Worksheet 21
Inserting or Deleting Rows or Columns 21
Using **Cut**, **Copy** and **Paste** 22
Using **Paste Special...** 22
Using **Paste Special** to Transpose Rows and Columns 23
Using **Clear...** 24
Using **Insert** 24
To **Copy**, **Cut** or **Paste** Using Drag-and-Drop Editing 24
Duplicating Values or Formulas in a Range of Cells 25
Absolute, Relative and Mixed References 26
Relative References When Using **Copy** and **Cut** 27
Using AutoFill to **Fill Down** or **Fill Right** 27
Using AutoFill to Create a Series 28
Formatting Worksheets 29
Using **Column Width** and **Row Height** 29
Using **Alignment...** 30
Using **Font...** 31
The Alternate Character Set 32
Entering Subscripts and Superscripts 33
Using **Border** and **Patterns.** 33
Using the Format Painter Toolbutton 34
Number Formatting 35
Using Excel's Built-in Number Formats 35
Custom Number Formats 36
Variable Number Formats 38
Conditional Number Formats 38
Using the Number Formatting Toolbuttons 39
Formatting Numbers Using "Precision as Displayed" 39
Protecting Data in Worksheets 40
Using **Protection** 40
Protecting a Workbook by Making it Read-Only 40
Controlling the Way Documents Are Displayed 41
Viewing Several Worksheets at the Same Time 41
Using **New Window** and **Arrange...** 41
Different Views of the Same Worksheet 42
Using **New Window** 43
Using **Split** 43
Using **Freeze Panes** 44
Copying from Excel to Microsoft Word 44
Using **Copy** and **Paste** 45

Making a "Screen Shot" (Macintosh) 45
Making a "Screen Shot" (Windows) 46
Useful References 46

Chapter 2 Creating Charts: An Introduction 47
Only One Chart Type Is Useful for Chemists 47
Creating a Chart 47
Creating a Chart Using the ChartWizard 47
Activating, Resizing and Moving an Embedded Chart 50
Formatting Charts: An Introduction 50
Using the Chart Menu 50
Using **Chart Type...** to Switch From One Chart Type to Another 51
Using **Chart Options...** to Add Titles, Gridlines or a Legend 51
Using **Location...** to Move or Copy an Embedded Chart 51
Formatting the Elements of a Chart 51
Selecting Chart Elements 52
Formatting Chart Elements 52

PART II: ADVANCED SPREADSHEET TOPICS 57

Chapter 3 Creating Advanced Worksheet Formulas 59
The Elements of a Worksheet Formula 59
Operators 59
Absolute, Relative and Mixed References 60
Creating and Using 3-D References 60
Creating and Using External References 61
Creating an External Reference by Selecting 62
Creating an External Reference by Using Paste Link 62
The External Reference Contains the Complete Directory Path 62
Updating References and Re-Establishing Links 62
Entering Worksheet Formulas 63
Using Names Instead of References 64
Using Define Name 64
Using Create Names 65
Using the Drop-Down Name List Box 67
Entering a Name in a Formula by Selecting 67
Using Apply Names 68
Using Paste Name 68
Deleting Names 68
Changing a Name 69
Names Can Be Local or Global 69
The **Label...** Command 70
Excel Will Create Labels Automatically 71
Worksheet Functions: An Overview 71
Function Arguments 72

Math and Trig Functions 72
Functions for Working with Matrices 73
Statistical Functions 73
Logical Functions 73
The IF Function 73
Nested IF Functions 74
AND, OR and NOT 76
Date and Time Functions 76
Date and Time Arithmetic 78
Text Functions 78
The LEN, LEFT, RIGHT and MID Functions 78
The UPPER, LOWER and PROPER Functions 79
The FIND, SEARCH, REPLACE, SUBSTITUTE and EXACT Functions 79
The FIXED and TEXT Functions 80
The VALUE Function 81
The CODE and CHAR Functions 81
Lookup and Reference Functions 81
The VLOOKUP and HLOOKUP Functions 82
The LOOKUP Function 82
The INDEX and MATCH Functions 82
Using Wildcard Characters with MATCH, VLOOKUP or HLOOKUP 83
The OFFSET Function 83
Using Insert Function 83
A Shortcut to a Function 85
Creating "Megaformulas" 85
Troubleshooting the Worksheet 87
Error Values and Their Meanings 87
Examining Formulas 87
Finding Dependent and Precedent Cells 88
Using Paste List 88
Useful References 89

Chapter 4 Creating Array Formulas 91
Using Array Formulas 91
Array Constants 93
Editing or Deleting Arrays 94
Formulas That Return an Array Result 94
Creating a Three-Dimensional Array on a Single Worksheet 95
Evaluating Polynomials or Power Series Using Array Formulas 96
Using the ROW Function in Array Formulas 97
Using the INDIRECT Function in Array Formulas 97
Using Array Formulas to Work With Lists 97
Counting Entries in a List Using Multiple Criteria 98

Counting Common Entries in Two Lists 99
Counting Duplicate Entries in a List 100
Counting Unique Entries in a List 101
Indicating Duplicate Entries in a List 101
Returning an Array of Unique Entries in a List 103
Using an Array Formula to Sort a 1-D List 104
Using an Array Formula to Sort a 2-D List 105

Chapter 5 Advanced Charting Techniques 109
Good Charts vs. Bad Charts 109
Charts with More Than One Data Series 110
Plotting Two Different Sets of Y Values in the Same Chart 110
Plotting Two Different Sets of X and Y Values in the Same Chart 111
Another Way to Plot Two Different Sets of X and Y Values 112
Extending a Data Series or Adding a New Series 114
The Copy and Paste Method 114
The Drag and Drop Method 114
The Color-Coded Ranges Method 114
Using Source Data... in the Chart Menu 116
Editing the SERIES Function in the Formula Bar 116
Customizing Charts 116
Plotting Experimental Data Points and a Calculated Curve 116
Adding Error Bars to an XY Chart 118
Adding Data Labels to an XY Chart 120
Charts Suitable for Publication 121
Changing the Default Chart Format 121
Logarithmic Charts 122
3-D Charts 123
Using Excel's Built-in 3-D Chart Format 123
Charts with Secondary Axes 124
Getting Creative with Charts 126
A Chart with an Additional Axis 127
A Chart with an Inset 129
Linking Chart Text Elements to a Worksheet 130
To Switch Plotting Order in an XY Chart 131
Some Chart Specifications (Excel 2000) 132

Chapter 6 Using Excel's Database Features 133
The Structure of a List or Database 133
Sorting a List 133
Sorting According to More Than One Field 135
Sort Options 135
Using AutoFilter to Obtain a Subset of a List 136
Using Multiple Data Filters 138
Defining and Using a Database 138

Creating a Database 138
Defining a Database 139
Adding or Deleting Records or Fields 139
Updating a Database Using Data Form 139
Finding Records That Meet Criteria 141
Defining and Using Selection Criteria 141
Using Multiple Criteria 142
Special Criteria for Text Entries 143
Extracting Records 144
Using Database Functions 145

Chapter 7 Getting Data into Excel 147
Direct Input of Instrument Data into Excel 147
Transferring Files from Other Applications to Excel 147
Using the Text Import Wizard 147
Using Text to Columns 151
From Hard Copy (Paper) to Excel 151
Using a Scanner to Transfer Numeric Data to Excel 151
Using a Scanner to Transfer Graphical Data to Excel 154
Selecting Every Nth Data Point 154
Using AutoFill 154
Using the Sampling Tool 155
Using a Worksheet Formula 157

Chapter 8 Adding Controls to a Spreadsheet 159
You Can Add Option Buttons, Check Boxes, List Boxes and Other Controls to a Worksheet 159
How to Add a Control to a Worksheet 160
Control Properties 161
A List Box on a Worksheet 163
A Drop-down List Box on a Worksheet 163
Option Buttons and a Drop-down List Box 165

PART III: SPREADSHEET MATHEMATICS 167

Chapter 9 Some Mathematical Tools for Spreadsheet Calculations 169
Looking Up Values in Tables 169
Getting Values from a One-Way Table 169
Getting Values from a Two-Way Table 170
Interpolation Methods: Linear 171
Table Lookup with Linear Interpolation 171
Interpolation Methods: Cubic 173
Numerical Differentiation 175
First and Second Derivatives of a Data Set 175
Derivatives of a Function 178
Numerical Integration 179

An Example: Finding the Area Under a Curve....180
Differential Equations....182
Euler's Method....183
The Runge-Kutta Methods....184
Arrays, Matrices and Determinants....186
An Introduction to Matrix Algebra....187
Polar to Cartesian Coordinates....189
Useful Reference....191

Chapter 10 Graphical and Numerical Methods of Analysis....193
Finding Roots of Equations....193
The Graphical Method....193
The Method of Successive Approximations....194
The Newton-Raphson Method....196
Solving a Problem Using Goal Seek....198
Solving a Problem by Intentional Circular Reference....201
Solving Sets of Simultaneous Linear Equations....203
Cramer's Rule....204
Solution Using Matrix Inversion....205

Chapter 11 Linear Regression....207
Least-Squares Curve Fitting....207
Least-Squares Fit to a Straight Line....208
The SLOPE, INTERCEPT and RSQ Functions....208
Linear Regression Using LINEST....209
Least-Squares Fit of y = mx + b....211
Regression Line Without an Intercept....211
Weighted Least Squares....212
Multiple Linear Regression....212
Linear Regression Using a Power Series....214
Linear Regression Using Trendline....214
Linear Regression Using the Analysis ToolPak....216
Using the Regression Statistics....218
Testing Whether an Intercept Is Significantly Different from Zero....218
Testing Whether Two Slopes Are Significantly Different....219
Testing Whether a Regression Coefficient Is Significant....220
Testing Whether Regression Coefficients Are Correlated....220
Confidence Intervals for Slope and Intercept....221
Confidence Limits and Prediction Limits for a Straight Line....221
Useful References....222

Chapter 12 Non-Linear Regression Using the Solver....223
Non-Linear Functions....223
Using the Solver to Perform Non-Linear Least-Squares Curve Fitting....224
Using the Solver for Optimization....224

Using the Solver for Least-Squares Curve Fitting 224
Using the Solver: An Example 225
Comparison with a Commercial Non-Linear Least-Squares Package 230
Solver Options....231
The "Use Automatic Scaling" Option is Important for Many Chemical Problems....233
Statistics of Non-Linear Regression....233
A Macro to Provide Regression Statistics for the Solver 235
Using the SolvStat Macro 236
An Additional Benefit from Using the SolvStat Macro....237
Useful References 238

PART IV: EXCEL VISUAL BASIC MACROS....239

Chapter 13 Visual Basic for Applications: An Introduction....241
Visual Basic Procedures and Modules 241
There are Two Kinds of Macros 241
The Structure of a **Sub** Procedure 242
The Structure of a **Function** Procedure 242
The Visual Basic Editor 243
Getting Started: Using the Recorder to Create a **Sub** Procedure 245
The Personal Macro Workbook....247
Running a **Sub** Procedure 247
Assigning a Shortcut Key to a **Sub** Procedure....248
Getting Started: Creating a Simple Custom Function....248
Using a **Function** Macro 249
Renaming a Macro....250
How Do I Save a Macro?....250

Chapter 14 Programming with VBA....251
Creating Visual Basic Code....251
Entering VBA Code 251
Making a Reference to a Cell or Range of Cells 252
Making a Reference to the Active Cell or a Selected Range of Cells....253
Making a Reference to a Cell Other Than the Active Cell....253
References Using the **Union** or **Intersect** Method 253
Getting Values from a Worksheet 254
Sending Values to a Worksheet....254
Components of Visual Basic Statements 254
Operators....254
Variables and Arguments....255
Objects, Properties and Methods....255
Objects....256
Some Useful Objects....257
"Objects" That Are Really Properties 257

You Can Define Your Own Objects 257
Properties....257
Some Useful Properties 258
Using Properties....258
Methods....258
Some Useful Methods 258
Two Ways to Specify Arguments....259
Arguments With or Without Parentheses 260
Some Useful Functions....260
Using Worksheet Functions with VBA 260
Some Useful VBA Commands 261
VBA Data Types....261
The **Variant** Data Type 262
String Data Types 263
The Boolean (**Logical**) Data Type 264
Declaring Variables or Arguments in Advance 264
Specifying the Data Type of an Argument....264
Specifying the Data Type Returned by a **Function** Procedure 264
Program Control....265
Decision-Making (Branching) 265
Logical Operators 266
Looping 267
For...Next Loops 268
For Each...Next Loops 268
Do While... Loop 268
Exiting from a Loop or from a Procedure....269
Subroutines....269
Scoping a Subroutine 270
Interactive Macros 270
MsgBox 270
MsgBox Return Values 272
InputBox 272
Testing and Debugging....273
Tracing Execution....274
Stepping Through Code 274
Adding a Breakpoint....275
Examining the Values of Variables....276
Using Conditional Watch 278
Useful References 278

Chapter 15 Working with Arrays in VBA 279
Visual Basic Arrays....279
Dimensioning an Array....279
Use the Name of the Array Variable To Specify the Whole Array....279

Multidimensional Arrays 279
Returning the Dimensions of an Array 279
Dynamic Arrays 279
Preserving Values in Dynamic Arrays 280
Working With Arrays in **Sub** Procedures:
Passing Values From Worksheet to VBA Module 282
Using a Loop to Transfer Values from a Worksheet to A VBA Array 282
A Range Specified in a **Sub** Procedure
Can Be Set Equal to an Array Variable 283
Some Worksheet Functions Used Within VBA Create an Array 283
An Array of Object Variables 284
Working With Arrays in **Sub** Procedures:
Passing Values From VBA Module to Worksheet 285
Using a Loop to Transfer Values from a VBA Array to a Worksheet 285
Equating a Worksheet Range To an Array Variable 285
A 1-Dimensional Array Assigned To a Worksheet Range
Can Cause Problems 286
Speed Differences in Reading or Writing Arrays
Created by Two Different Methods 288
Working With Arrays In **Function** Procedures:
From Worksheet To Module 288
A Range Passed to a **Function** Procedure
Automatically Becomes an Array 288
Passing an Indefinite Number of Arguments
Using the **ParamArray** Keyword 289
Returning an Array of Values as a Result 289

Chapter 16 Creating Command Macros 291
Creating Advanced Macros in VBA 291
Creating a Simple **Sub** Procedure to Format Text as a Chemical Formula 291
Adding Enhancements to the ChemicalFormat Macro 292
Adding More Enhancements 293
Creating a **Sub** Procedure to Apply Data Labels in a Chart 295

Chapter 17 Creating Custom Functions 299
A Custom Statistical Function 299
A **Function** That Takes an Optional Argument 302
A **Function** That Takes an Indefinite Number of Arguments 303
Providing a Description for a **Function**
in the Paste Function Dialog Box 306
Assigning a Custom Functionto a Function Category 307
Creating Add-In **Function** Macros 307
How to Create an Add-In Macro 307
How to Protect an Add-In Workbook 307

Advantages and Disadvantages of Using **Function** Macros 308

Chapter 18 Creating Custom Menus and Menu Bars 309
Modifying Menus or Menu Bars 309
Adding or Removing a Menu Command.....309
Creating A New Menu Bar 310
Adding a Custom Menu to a Menu Bar 311
Adding a Custom Menu Command to a Menu 312
Modifying Menus or Menu Bars by Using Visual Basic 313
Adding a Menu Command by Means of an Auto_Open Macro.....313
Adding a Menu Command by Means of an Event-Handler Procedure 314

Chapter 19 Creating Custom Tools and Toolbars.....317
Customizing Toolbars.....317
Moving and Changing the Shape of Toolbars 317
Activating Other Toolbars.....318
Adding or Removing Tool buttons from Toolbars.....319
Creating a New Toolbar 320
Creating Custom Toolbuttons.....321
The NumberFormatConvert Macro.....323
The FullPage Macro.....324
Creating a Custom Toolbutton Image.....325
How to Add a ToolTip to a Custom Button.....326
Creating Toolbuttons or Toolbars by Means of a Macro.....326

PART V: SOME APPLICATIONS 327

Chapter 20 Analysis of Solution Equilibria 329
Species Distribution Diagrams.....329
Analysis of Titration Data.....332
Simulation of Titration Curves Using a Single Master Equation 337

Chapter 21 Analysis of Spectrophotometric Data 339
Calibration Curves for Spectrophotometry 339
Analysis of Spectra of Mixtures.....341
Applying Cramer's Rule to a Spectrophotometric Problem 341
Solution Using Matrix Inversion 343
Deconvolution of Spectra 344
Mathematical Functions for Spectral Bands 344
Deconvolution of a Spectrum: An Example.....345
Tackling a Complicated Spectrum.....347

Chapter 22 Calculation of Binding Constants 349
Determination of Binding Constants by pH Measurements.....350
Experimental Techniques 350
Separation of Overlapping Protonation Constants for a Polyprotic Acid....351

Two Overlapping Protonation Constants of N-(2-Aminoethyl)-1,4-diazacycloheptane 352
Three Overlapping Protonation Constants of a Polyamine Using Least-Squares Curve Fitting and the Solver....356
Determination of Binding Constants by Spectrophotometry 359
Experimental Techniques 361
Calculations 361
Determination of Two Overlapping Protonation Constants of 4,5-Dihydroxyacridine....361
The Bjerrum pH-Spectrophotometric Method 365
Determination of Binding Constants by NMR Measurements 368
Experimental Techniques 368
Calculations 369
Monomer-Dimer Equilibrium....369

Chapter 23 Analysis of Kinetics Data....373
Experimental Techniques 373
Analysis of Monophasic Kinetics Data....373
First-Order Kinetics 373
Reversible First-Order Reactions....376
When the Final Reading Is Unknown....376
Second-Order Kinetics 378
Pseudo-First-Order Kinetics 378
Analysis of Biphasic Kinetics Data 379
Concurrent First-Order Reactions 379
Consecutive First-Order Reactions 379
Consecutive Reversible First-Order Reactions....383
Simulation of Kinetics by Numerical Integration....386

PART VI: APPENDICES....389

Appendix A Selected Worksheet Functions by Category....391
Appendix B Alphabetical List of Selected Worksheet Functions....397
Appendix C Selected Visual Basic Keywords by Category....417
Appendix D Alphabetical List of Selected Visual Basic Keyword....421
Appendix E Shortcut Keys for PC and Macintosh....441
Appendix F Selected Shortcut Keys by Category 457
Appendix G About the CD-ROM That Accompanies This Book....463

INDEX 469
