

Contents

- Contributors, vii
- Foreword, x
MF Perutz
- Preface to the third edition, xii
- Abbreviations, xiii
- 1 Beginnings: the molecular pathology of hemoglobin, 1
David Weatherall
- 2 Molecular cytogenetics and array-based genomic analysis, 19
Debra M Lillington, Silvana Debernardi & Bryan D Young
- 3 Stem cells, 26
Eyal C Attar & David T Scadden
- 4 The genetics of acute myeloid leukemias, 42
Carolyn J Owen & Jude Fitzgibbon
- 5 Secondary myelodysplasia/acute myelogenous leukemia: assessment of risk, 51
D Gary Gilliland & John G Gribben
- 6 Detection of minimal residual disease in hematological malignancies, 57
John G Gribben
- 7 Chronic myelogenous leukemia, 76
Alfonso Quintás-Cardama, Jorge Cortes, Hagop Kantarjian & Susan O'Brien
- 8 Myelodysplastic syndromes, 89
M Mansour Ceesay, Wendy Ingram & Ghulam J Mufti
- 9 Myeloproliferative disorders, 104
Anthony J Bench, George S Vassiliou & Anthony R Green
- 10 Lymphoma genetics, 117
Anthony G Letai & John G Gribben
- 11 The molecular biology of multiple myeloma, 127
Wee Joo Chng & P Leif Bergsagel
- 12 The molecular basis of anemia, 140
Lucio Luzzatto & Anastasios Karadimitris
- 13 Anemia of chronic disease, 165
Tomas Ganz
- 14 The molecular basis of iron metabolism, 169
Nancy C Andrews & Tomas Ganz
- 15 Hemoglobinopathies due to structural mutations, 179
D Mark Layton & Ronald L Nagel
- 16 Molecular pathogenesis of malaria, 196
David J Roberts & Chetan E Chitnis
- 17 Molecular coagulation and thrombophilia, 208
Björn Dahlbäck & Andreas Hillarp
- 18 The molecular basis of hemophilia, 219
Paul LF Giangrande
- 19 The molecular basis of von Willebrand disease, 233
Luciano Baronciani & Pier Mannuccio Mannucci
- 20 Platelet disorders, 246
Kenneth J Clemetson
- 21 The molecular basis of blood cell alloantigens, 259
Willem H Ouwehand & Cristina Navarrete
- 22 Functions of blood group antigens, 276
Jonathan S Stamler & Marilyn J Telen
- 23 Autoimmune hematological disorders, 287
Drew Provan, Adrian C Newland & John W Semple
- 24 Hematopoietic growth factors: a 40-year journey from crude "activities" to therapeutic proteins, 306
Graham Molineux & Stephen J Szilvassy
- 25 Molecular therapeutics in hematology: gene therapy, 318
Jeffrey A Medin
- 26 Pharmacogenomics, 336
Leo Kager & William E Evans

- 27 Gene expression profiling in the study of lymphoid malignancies, 350
Ulf Klein & Riccardo Dalla-Favera
- 28 History and development of molecular biology, 360
Paul Moss
- 29 Cancer stem cells, 370
David C Taussig & Dominique Bonnet
- 30 Molecular basis of transplantation, 380
Francesco Dazzi
- Appendix 1 Glossary, 390
- Appendix 2 Cytogenetic glossary, 394
- Appendix 3 Cluster designation (CD) antigens used in this book, 395
- Index, 396
- Color plates can be found facing pages 176 and 304*
